- 15" diameter

about *Metra*

We at Metra always strive to listen to our customers. You have told us to do a better job at telling the Metra story. For over 70 years, Metra has maintained its cutting edge by paying attention to our marketplace and innovating products to the needs of the installer. We are the "Installer's Choice" because we are installers.

We design our products to be easy to use and easy on the eyes. If you can see a Metra product, then we haven't done our job. Metra Turbokits are designed to be heard but not seen. This means that our fit and finish is the best in the business.

Our GSXL Turbowires are designed with the same philosophy in mind. Their longer length for ease of installation and thicker OEM cables with OEM connectors make for a mighty install, with no down time on returns or angry customers.

It is with this in mind that we proudly introduce our new website. So what are you waiting for? Get your buyers guide to check out the new lines and let us know what you think. We at Metra have always known that the installer is our real "end user"—not the buyer, not the distributor and not the customer who owns the car. We are the "Installer's Choice" because our customer is the installer, and with this philosophy we built a company... Metra. Thank you for all your loyal support.
